

Vendor Management for Operators

Drilling for oil & gas is a huge orchestration of hundreds of vendors. As the vendor manager or supply chain expert, your time is too valuable to be spent doing administrative functions like filing, or calling vendors for information. DeepData automates these administrative functions, so you can focus on the high-value aspects of vendor management or supply chain management.

DeepData uses a vendor self-service model. You simply invite potential vendors to use the system. Your vendors, who use the system for free, enter all of their information and update it as it changes. DeepData then puts all of this information at your fingertips. Anything you want to know about any vendor is just a mouse click away.

DeepData facilitates and automates things like MSA negotiation, proof of insurance, and organizes your vendors by the areas they service and the services they provide. Then you manage the vendors.

A mobile app, running on all major smartphones, provides your Company Man with the prioritized list of vendors based on location and vendor category. With a single button the Company man can call, text or email the approved vendors.

Using DeepData, you'll eliminate the boring aspects of vendor management, while enjoying fresher information, improved efficiency and reduced non-productive time. In short, you will quickly become a supply chain superstar at your company.

Operator Benefits

Feature	Benefit
<u>Vendor Dashboard</u> : Instantly see your vendors, their approval status, areas serviced, insurance status, MSA status and more. Includes searching, sorting and filtering of the view.	All of your vendor information is now right at your fingertips. Questions that used to take hours of file and hardcopy research are now answered in a single mouse-click.
<u>Vendor Update Alerts</u> : If a vendor updates any information, e.g. an MSA redline, insurance information, etc. you get are alerted to the change.	You are instantly alerted to any vendor change, so you are never behind the times or caught off-guard when something materially changes with your vendors.
<u>Vendor Self-Service – Locations, Services & Supplies</u> : Your vendors describe each area they service and the services & supplies they offer in each area.	No more chasing vendors and collecting, & organizing vendor data for each operating area. DeepData shows you, for each vendor category, who provides that category of goods or services in each area. And if a vendor changes their offering or locations, you get updated in real-time.
<u>Vendor Self-Service – Insurance</u> : You define your insurance requirements and your vendors maintain the current data on their insurance policies, including uploading proof of coverage.	You know exactly which vendors are compliant with your insurance requirements, including coverage amounts, named insured and waiver of subrogation.
<u>Vendor Self-Service – Other Requirements</u> : Add any other requirements for vendors, such as prison letters to work on prison grounds.	Your vendors know exactly what you expect from them, avoiding mix ups and delays at the wellsite.
<u>Centralized MSA Management</u> : You load your Standard MSA, and the system maintains time-stamped versions, including the redline process with each vendor.	No more filing cabinets or shared folders for MSAs and redlines. You legal has direct access to the documents associated with each vendor and you get alerts of any redline updates. When you update your MSA, the timestamps tell you who is compliant with the new MSA and who isn't.
<u>Invite Vendors</u> : There are two ways to invite vendors. You can send an invitation through DeepData, or send them to www.deepdata.com/vendor with your company code.	Quickly and easily invite your vendors to DeepData. It costs them nothing and they enter and manage all of their data in the system for you.

Operator Benefits (continued)

Feature	Benefit
<p><u>Vendor Drill-Down</u>: A single screen per vendor with their status for the MSA, insurance, service areas and services, and more. From here you can approve/disapprove vendors with a single mouse click.</p>	<p>Click on any vendor in the system and you instantly get complete information about them and their status.</p>
<p><u>Mobile App for the Company Man</u>: The mobile app organizes vendors by category and priority, providing one-click options for phone, email or text access to vendors.</p>	<p>DeepData's mobile app make is far easier for the Company Man to contact the right vendor instantly using text, phone or email.</p>
<p><u>Vendor Prioritization</u>: For each area and each category, you can define your preferred vendor priority by simply dragging the vendor names on a list.</p>	<p>Prioritize vendor priorities so the Company Man, using the mobile app, knows who he should contact for each service.</p>
