

Vendor Management for Vendors

Would you like to reduce your overhead, while increasing customer satisfaction and sales...all at no cost? That is exactly what DeepData provides. You spend too much time and effort managing your customers, we make it fast, easy and efficient.

Right now you deal individually with each of your customers, providing information about the areas you service, and the services you provide. You also have to document your insurance coverage...for each customer. With DeepData, you enter that information once and it is instantly available to all of your customers as well as future prospects. Customers and prospects may discover that you provide services or cover areas they didn't even know about, helping you grow your business.

DeepData also handles MSA negotiation, storage, and retrieval. No more searching through filing cabinets or shared storage for the MSA you need. It is now instantly available, along with a redline history.

Only customers pay to use DeepData, so you pay nothing as a vendor. That's right, DeepData helps your reduce overhead, cut costs, improve customer satisfaction and grow your revenues, all at no cost to you. Get started now and invite your customers to use DeepData. In fact, sign-up as a customer and invite your vendors to use DeepData as well.

Vendor Benefits

Feature	Benefit
<u>Customer Dashboard</u> : Instantly see your status with customers (approval status, MSA redlines and more). Includes searching, sorting and filtering of the view.	DeepData puts all of your customer information at your fingertips. Questions that used to take hours of file and hardcopy research are now answered in a single mouse-click.
<u>Customer Update Alerts</u> : Alerts instantly inform you of changes to your approval status, MSA redline updates and more.	You might start losing business from customers without knowing that you are no longer an approved vendor, or your MSA is outdated. DeepData keeps you informed with instant alerts to any change in your status. This keeps your phones and cash register ringing.
<u>Self-Service – Locations, Services & Supplies</u> : Enter the services you provide and the areas you service and your customers are all updated immediately.	Grow your business! Your customers and prospects can find services you provide or locations you service that they might not even know about.
<u>Self-Service – Insurance</u> : Upload your insurance information once and all vendor have immediate access.	Sending all of your insurance information to every customer is a major pain. With DeepData, you do it once, and all of your customers get it instantly.
<u>MSA Management</u> : DeepData stores the MSA for each customer and tracks any redline changes to the MSAs, as well as the final versions.	Managing MSAs can be a full-time job. Negotiating, storing, finding and checking them takes a lot of time. Now they are all instantly available with the click of a mouse.
<u>Invite Customers</u> : DeepData provides a simple way to invite all of your customers to use the system.	Reduce your work and improve efficiency by inviting all of your customers to use DeepData.
<u>Sign-up as a Customer & Invite Your Vendors</u> : As a customer, your vendors can also use DeepData.	You'll also love DeepData as a customer for your vendors. You enjoy tremendous insight and efficiency.
